BPA Magazine Master Index 1964-2013

Authors: Graham Spicer & Andrew Hilton

1. Introduction

This is the BPA Archive Master Index for all BPA Magazines produced between 1964 (the first year of production) and 2013. Identification of some of the older editions is not straightforward due to inconsistencies, errors and omissions in their identifying information. This has been exacerbated by the early irregularity and number of editions each year. The information used in the magazines comprises year, volume number, edition number within the volume and season or month. What we now know to be the last magazine of 1970 was originally identified as “The edition with an 8 way on front cover and 1970 Nationals Report on page 9”. The first edition of 1971 was also completely lacking in identifying information. During 1988, the preceding year’s volume number, 24, was carried forward resulting in 12 editions within the same volume spanning two years. 1989 editions were then identified as Volume 25 when, strictly, they should have been Volume 26. The use of volume numbers fell into disuse shortly afterwards. Some other anomalies are also apparent. There are duplicates for Volume 18 Edition 3 in 1981, Volume 19 Edition 5 in 1982 and Volume 20 Edition 5 in 1983. The use of Volume 20 was also carried forward for Edition 1 of 1984. The first edition of 1988 has ‘March’ inside and ‘February’ on the front cover. These errors have been highlighted by the use of red text in the Index and an explanatory entry in the ‘Notes’ column.

These inconsistencies have necessitated the creation of a unique Archive Reference number for each magazine. This takes the form sss-yyyy-e where ‘sss’ is a three digit magazine sequence number with leading zeros, ‘yyyy’ is the year and ‘e’ is the edition in that year. This edition represents a physical magazine rather than the edition number printed in the magazine. As an example, a combined ‘Volume 7’ ‘Spring/Summer’ magazine was produced in 1970 and numbered ‘1/2’. This was the first magazine of 1970 and the Archive Reference is therefore 023-1970-1. When an edition spans two years, for example ‘December/January’ in ‘1992/1993’, the edition is numbered as the last physical magazine of the first year in this case 153-1992-6.

The Index was compiled by assembling a complete collection of BPA magazines, inspecting each magazine individually, and then recording any identifying information. The details recorded under ‘Year’, ‘Volume’, ‘Edition’ and ‘Season or Month’ in the Index are those that appear in the magazine when present. A gap in the Index indicates that this particular information was not included when the magazine was published.
